

ELEFANT™ SUGAR DISSOLVING OIL

ELEFANT™ Sugar Dissolving Oil is certified by NSF as a H1 lubricant according to 21 CFR 178.3570 and used to quickly dissolve sugar particles, sugar crusts, or starch that adhere to various parts of processing or packaging equipment in the food and pharmaceutical industry. By effectively removing and preventing clogs, this highly specialized lubricant ensures smooth machinery operation, thus reducing costly maintenance and downtime.

Application: Apply the oil directly to the affected areas where sugar deposits, crusts, or starch have adhered. These areas are typically found on processing or packaging equipment in the food or pharmaceutical industry.

Dissolving Action: Allow the oil to work its magic. It will quickly dissolve the sugar particles, making them easier to remove. Depending on the equipment and the severity of the deposits, you can either wipe the dissolved sugar away using a cloth or rinse it off with water.

Preventive Measures: For preventive maintenance, consider applying the oil regularly to prevent sugar buildup and ensure smooth machinery operation. Regular use can reduce costly downtime.

Remember to consult the specific instructions provided by the manufacturer for any additional details or precautions.

ELEFANT™ Sugar Dissolving Oil comes in 10-liter containers (approx. 2.64 gal) and has a shelf life of 18 months.

For more technical details and information please consult our technical data sheet and material safety data sheet.
